

PE at Wyke Regis Primary Federation

Intent Statement

We aim beyond the requirements of the National Curriculum for Physical Education; providing a broad, balanced and differentiated curriculum; ensuring a progressive development of Physical Education concepts, knowledge and skills.

We have designed our Physical Education curriculum to develop and aid the physical, social and emotional needs of our learners through providing a wide range of sporting opportunities in gymnastics, games and dance. We strongly believe that Physical Education is a subject in which our unique learners can develop not only important physical skills, but can also learn and value the importance of a wide range of key life skills such as respect, perseverance, communication and being aspirational. We aim to give our children experiences in leadership, being a team contributor and understanding the value in healthy competition throughout their time with us. We believe that through these inspirational experiences and our Physical Education curriculum, the learners at Wyke Regis Primary Federation will grow and become physically skilled, forward-thinking, resilient and respectful members of their global community.

We choose important threads that link the learning from the Foundation Stage to the end of Year 6. In Physical Education, those are both skill-based through fine motor skills, body movement, coordination, strength and physical fitness targets as well as having a strong focus on the PSHE opportunities that arise every day in Physical Education lessons. These are important for our learners because, upon leaving us, we aim for them to be communicative, hardworking individuals as well as skilled sportspeople.

Through our Federation curriculum drivers, Physical Education will develop the children's creativity by giving them opportunities to be expressive, create, adapt and evaluate as both an individual and as part of a team through a wide range of Games as well as more creative Physical Education elements such as Gymnastics and Dance. Our children will build resilience by learning the vital importance of how to win and lose, developing competitive skills and how to react to and bounce back from failure. Our learners will raise their aspirations to become positive role models, active and selfless members of their communities as well as knowing and understanding that it is possible, despite living in our area, to become a global sporting superstar.

We make our Physical Education learning inclusive to all learners by not discriminating against any ability or skill. We want to give all children at Wyke an opportunity to be a part of and enjoy our Physical Education curriculum by ensuring that all learners are actively involved and have a chance to engage in valuable, shared experiences through sport.

To enrich the learning opportunities further in Physical Education, we plan to offer our learners a wide variety of captivating extra-curricular activities. We aim to do this by using the enhanced skillset of our Wyke Regis Federation staff members as well as qualified sporting role models from our wider community to offer during and after school clubs to give our learners extra opportunities to keep healthy and to develop their physical and social skills. We also aim to take extra-curricular opportunities further by taking our children outside of our school environment to gain experience in competing against others. This will play an important role in delivering our Physical Education curriculum goals.

We want our learners to leave Wyke Regis Primary Federation as beyond-capable sportspeople as well as caring, respectful and inspirational global citizens.
